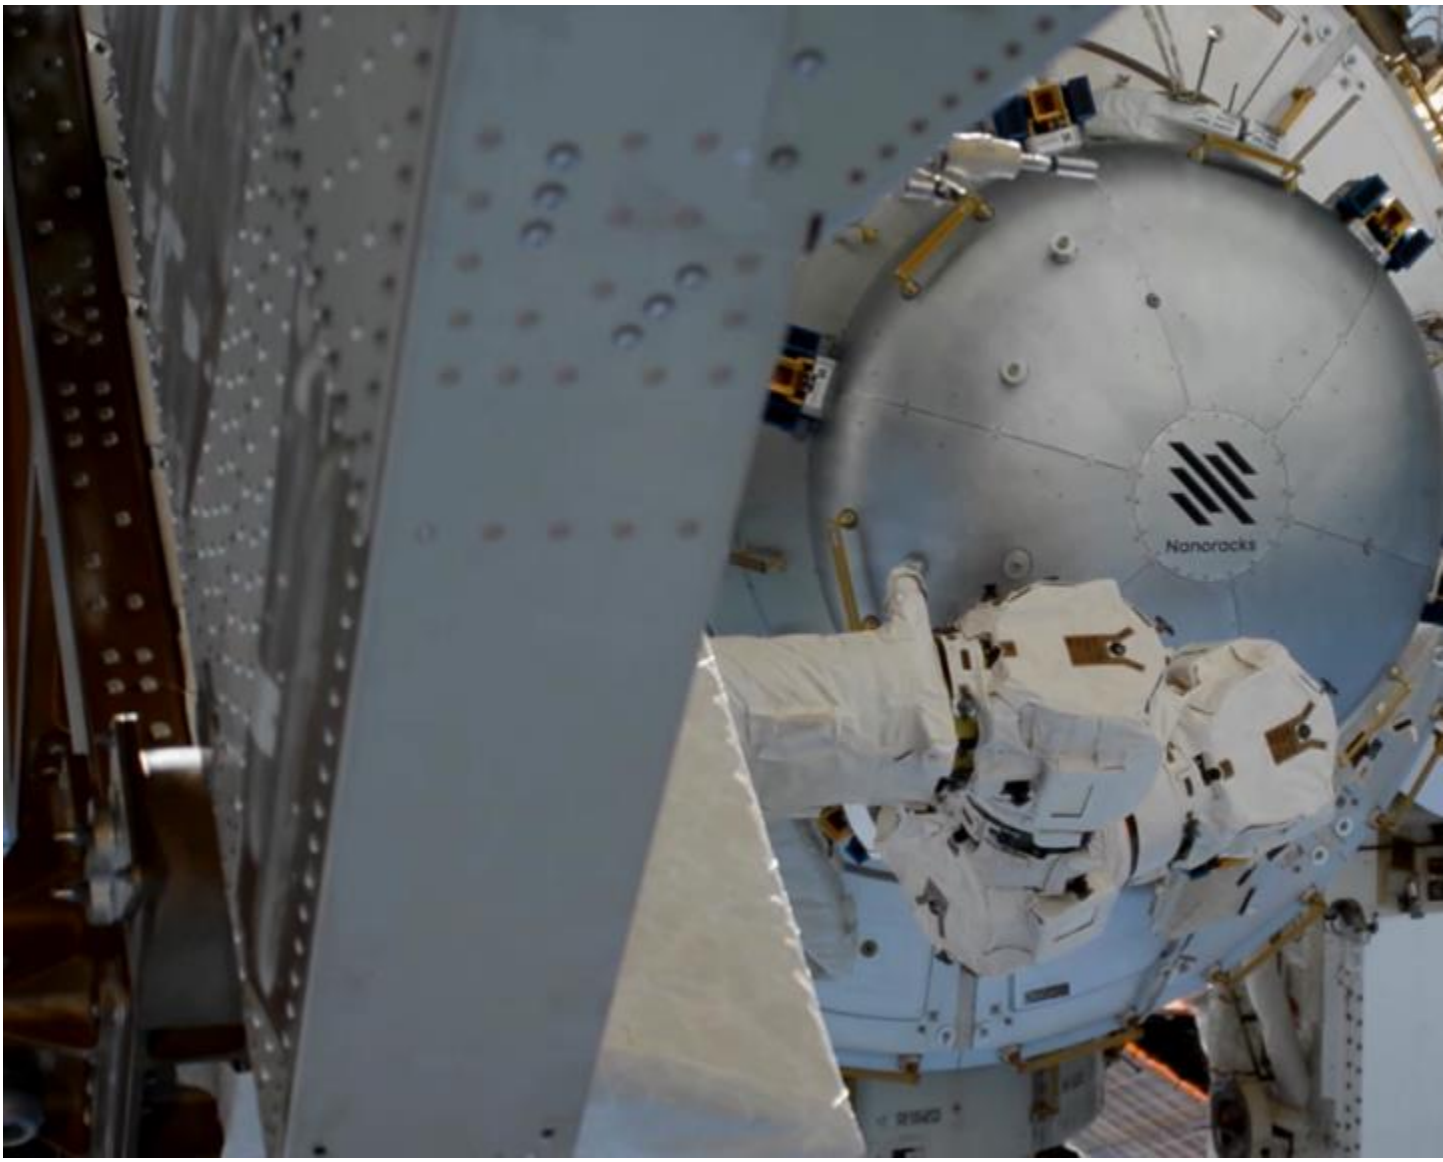
Birmingham Fastener News

Alabama Aerospace Supplies Fasteners for the Space Station’s Bishop Airlock



Our team at Alabama Aerospace recently supplied our partners at Nanoracks with hardware for the Bishop Airlock, which was installed on the International Space Station on December 19th. The Nanoracks Bishop Airlock Module will allow teams to move larger payloads inside and outside the station.

Learn more about the Bishop Airlock here or watch the installation time lapse here.

Congrats to our team at Alabama Aerospace for this amazing achievement!
