

For Immediate Release: Introducing Aluminati Skateboards College Cruisers Powered with Sunset Skateboards Flare™ Led Wheels

Corona, CA -- Aluminati Skateboards, maker of the most innovative Freestyle Cruiser boards, has teamed up with fellow California based company Sunset Skateboards, to offer college cruisers powered by Sunset Flare™ LED wheels.

Aluminati's cruisers are crafted from recycled aircraft-grade recyclable aluminum in Southern California and feature endless graphic options and clear grip. Aluminati partnered with Sunset Skateboards because of a common philosophy. Both companies share a passion for the California lifestyle and allow skaters to express themselves with unique designs.

The collaboration will be offered on select college cruisers for Fall 2016. The self-powered Flare™ LED Wheels give over 100,000 hours of light without any batteries.

Join us. Adventure awaits.

About Aluminati:

Aluminati Skateboards is reimagining the cruiser board. Recycled aircraft aluminum, integrated clear grip and endless graphics options make Aluminati the new classic. Born and made in Southern California, Aluminati fuses the tradition and nostalgia of cruiser boards with the performance and precision of modern technologies. Aluminati's dynamic and vibrant graphics are a product of a proprietary in-house manufacturing process that is as innovative as the precision machined aluminum deck.
