PIONEERING INNOVATION IN STAND-UP ELECTRIC CYCLES – GLIDE PRODUCTS ARE QUICK, AGILE & SUPER FUN TO RIDE!

Glide Designs and Manufactures a Very Unique Line of Zero Emissions, Short-Range Alternate Transportation Solutions for Personal and Industrial Patrol Applications.

At Glide we are dedicated to designing and producing high quality but affordable products that improve rider lifestyle, utility and cost savings. Our innovative engineering has produced frames that are extremely strong (supporting total weights in excess of 600 LBS) in addition to a creating a solid platform with a low center of gravity. Ultimately, that makes our machines very easy and stable to ride! New for 2016, all Glide models have an integrated 26" front wheel and suspension-fork producing a rugged smooth ride with added safety and rider stability.

Glide Electric Cycles come with a variety of performance and convenience components to make our rider experience the best it can be! These components are critical from a rider safety standpoint but also dramatically impact the substantial fun-factor associated with every outing or riding adventure. Standard features in our economy models speaks volumes and our flagship top of the line editions set new trends. Some of the notable features in our products are:

- New Wireless Ignition System is standard on all Glide models
- Standard 48V Power System produces great torque, agility and mobility
- Removable 48V Lithium Battery is convenient for remote charging and unit transport

- Proven Suspension fork technology from the Mountain Bike industry
- Mechanical or Hydraulic Disc Brakes are standard depending on model level
- 203mm Rear Brake Rotor and 185mm front Rotor ensures optimum stopping balance
- We offer a variety of frame colors in addition to custom Color Options
- Basic to premium lighting options available for front / rear systems by model or upgrade
- LED Strip Lighting kits for frame accents take the fun factor up a notch or two

WHAT MARKETS DO WE ADDRESS?... Glide Electric Cycles are now positioned in 3 market categories: **Retail**, **Rental** and **Patrol**. Prior to 2016, Glide had produced and sold units into the retail consumer market and the police patrol market including city police, campus patrol and private security. In addition to (4) all-new Retail models and (2) all-new Police Patrol models, Glide has introduced (2) Rental series models for 2016. These great new tourism-based products will be positioned in key tourist cities through destination resort operations and dedicated rental agencies.

Glide Cruisers, USA was founded in 2010 with aspirations for designing clean energy transportation products for personal use and police / patrol applications. After several years of product development, market tests and strategic positioning – Glide introduced its latest technology and new line of highly crafted electric cycles in early 2016.
