

Introducing the Alizeti 300C

The Power To Move You

www.alizetibikes.com

Great Features, Less Effort, **More Fun!**

A Fully-Featured eBike Power System at a Price That Will Put a Smile on Your Face

The Alizeti 300C allows cyclists of any age or fitness level to enjoy cycling and healthy living without compromise. Alizeti gives you the freedom to aim for new horizons and to inspire yourself to go further than ever before!

The Alizeti 300C is the lightest, most powerful, and affordable eBike retrofit solution on the market today. City commuters, students, and adventure enthusiasts now have a fun, environmentally friendly way to commute while enjoying all of the practical features the Alizeti 300C has to offer. Our Flex-Drive system offers the perfect level of assist to match any cycling style. Regenerative braking recovers energy to recharge the battery for increased range. The integrated rider safety features include front driving LED lights, rear turning and stop signals as well as a specially formulated wet/dry friction wheel for optimal traction. Integrated bike security features include tamper alarm with theft deterrent strobe lights and code matched system components.

Designed for an on-the-go lifestyle, the Alizeti 300C includes convenient USB charging capabilities making it easy to stay connected anywhere you go. Integrated Bluetooth audio playback allows easy streaming from your mobile phone so you can enjoy your favourite music playlist while still riding safely.

The Alizeti 300C can be easily installed on virtually any bike. DIY installation is as quick and easy as mounting a bike rack and can be completed in 15 minutes.

Why settle for a simple eBike when you can re-purpose your favourite road bike and transform it into a fully-featured eBike system for a fraction of the cost.

Come enjoy all the fun an Alizeti powered eBike has to offer today!

About Alizeti

Our Mission

Alizeti has set out to redefine the cycling experience by revolutionizing the way people use bikes for commuting, leisure, and fitness. Our goal is to make cycling a more enjoyable experience for all ages and fitness levels. Our Alizeti 300C offers an affordable alternative to costly eBikes for cyclists around the globe. Allowing cyclists to repurpose their existing bikes with modern electronics keeps them out of landfills and extends the life-span and enjoyment of their initial investment.

By offering an adaptable ecosystem of products and accessories Alizeti delivers a seamless, integrated user experience that provides all the benefits of an eBike with the added intelligent functionality to safely augment the riding experience.

Our bigger, broader, and arguably more important mission is taking the utmost care to ensure all our products and manufacturing processes adhere to the highest environmental standards, assuring sustainability and a better quality of life for future generations.

“The Alizeti motto has always been to focus on quality, reliability, and customer service. Refusing to deviate from this formula continues to be the secret of our success!”

Our Roots

Headquartered in Montreal, Quebec, Canada, Alizeti takes great pride in creating high-quality Canadian e-Bike systems. Our Montreal facility serves as the centre of our global operations for engineering, production, testing, marketing, sales, and service. It is also home to the main assembly plant, where our eBike systems are built, tested and shipped to our customers across the world.

Meet the Alizeti Team

Our team is the heart and soul behind the Alizeti brand and has been working together for well over 20 years. Our expertise in electronic controls allows us to continually push the boundaries of electronic mobility and advance the development of our products. Our motto has always been to focus on quality, reliability, and customer service.

Louis Viglione President of Alizeti

Louis Viglione president and founder of Alizeti is driven by a passion for controls, sustainable engineering, and bringing new technology to our customers and partners.

Prior to founding Alizeti, Louis was president and founder of Viconics Technologies, a manufacturer of communicating thermostats and HVAC controls marketed to many leading OEMs.

Louis earned a B. Eng. from McGill in 1978.

Paolo Primiani Director of R&D

As Director of R&D, Paolo is involved in all aspects of product design and development for Alizeti. Paolo insures that the production process at Alizeti meets the highest standards of quality and excellence.

Prior to joining Alizeti, Paolo enjoyed a successful and fulfilling 25 year career as Director of R&D at Viconics Technologies.

Sergio Viglione Director of Manufacturing

Sergio Viglione is Alizeti's Director of Manufacturing reporting to Alizeti's president Louis Viglione.

His multi-disciplinary background allows him to advance production at Alizeti to the next level.

Prior to joining Alizeti, Sergio specialized in process optimization. His main focus was streamlining the Manufacturing and Engineering procedures for Viconics Technologies.

Ettore Colicchio Director of Technology

Ettore Colicchio is Alizeti's Director of Technology, reporting to Alizeti's president Louis Viglione.

Ettore leads the architecture and firmware design, as well as the firmware development team at Alizeti. Prior to joining Alizeti, Ettore was Product Owner and Systems Architect at Schneider Electric in Montreal. Ettore earned a Bachelor of Engineering in Computer Engineering from McGill University in 2003.

Tony Francischiello Director of Marketing

Tony Francischiello is Alizeti's Director of Marketing, reporting to Alizeti's president Louis Viglione.

Tony joined the Alizeti team in 2016 to oversee the Marketing and PR campaigns for the company. Prior to joining Alizeti Tony was creating unique and engaging marketing campaigns for Viconics Technologies. Previously, Tony was a senior Marketing Director at Schneider Electric's SBS division.

Cycling Redefined. Enjoy the Ride!

The Alizeti 300C is the game changer cyclists have been waiting for. By successfully combining performance, weight, simple installation and advanced features into an affordable system, Alizeti has bridged the gap between eBikes and traditional bikes.

No other eBike system can measure up to our range-to-weight ratio, rider safety features, and built-in security, at such an affordable price point.

Alizeti makes it easy to turn your favourite bike into the eBike you've always dreamed of owning. We are redefining cycling, and you can finally enjoy the ride!

“Starting at only \$699 MSRP for the commuter model, no other eBike system offers as much value in one easy-to-install solution.”

The 500-watt friction drive motor and lightweight removable 24 Volt lithium-ion battery, provides a speed of up to 20 Mph without pedaling. The Flex-Drive system allows cyclists to add a second high output battery to extend the range to up to 40 miles. You have the flexibility to choose the best distance-to-weight ratio for your commuting needs and budget.

Riders can select among pedal assist, throttle cruising, or unlimited variable power-assist mode, depending on their preferred riding style. Cyclists are in complete control of their riding experience.

The handlebar-mounted controller and removable OLED display with integrated LED front lights let cyclists see every detail of their ride. The integrated rear brake and turning lights ensure high visibility for safe riding day or night.

You Can Ride Easy Knowing Your Bike Is Protected, with Our Integrated Security Features

The Alizeti 300C includes an integrated security system to ensure your investment is always safe. Code protected system startup means no one can start the power system when you are away from your bike.

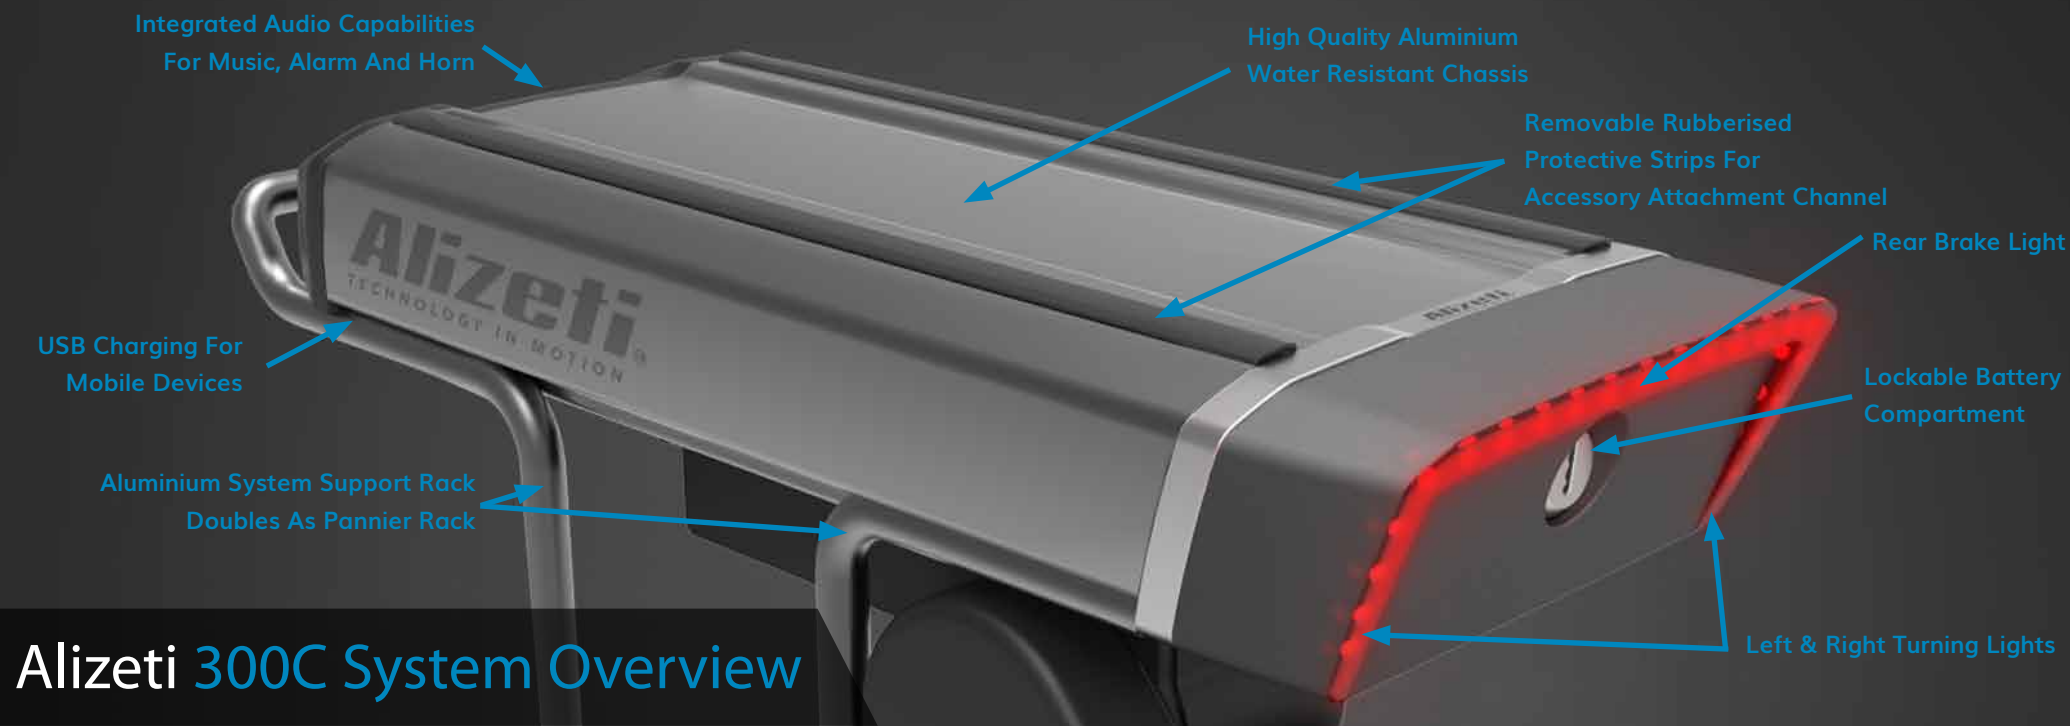

The lockable battery compartment houses removable battery units that are also code matched to the bike for added security. Batteries and other system components that are removed from the bike will only work with a code matched bike.

The onboard alarm system is automatically enabled when you park your bike and can sense any unusual movement or tampering while you are away. The system will alert you of any tampering by sounding the alarm even when the batteries are removed for charging!

Alizeti offers the most sophisticated theft deterrent features of any eBike on the market today!"

A Whole Lot More... For Less!

Great Value & Affordable Cost:

At only \$699 MSRP, no other eBike system offers as much value than the Alizeti 300C

Longer Range:

Ride an average of 25 to 37 miles or 40 to 60 km with 2 batteries
