

SOITAAB INNOVATION

Introducing the OMNIAtech

Soitaab, a global leader in cutting technology introduces the OMNIAtech for heavy plate fabrication.

With market trends pushing the development of multi-purpose machines that integrate many technologies on a single platform, the new OMNIAtech perfectly meets this All-in-One philosophy.

By seamlessly integrating all of the fabrication processes into a single unified system, the OMNIAtech delivers all of the abilities to cut, drill, thread, surface and hole mill, countersink, and a wide range of marking options in a single machine.

OMNIAtech meets the highest industry standards for quality, precision, productivity, reliability and ease of use. With the most sophisticated CNC controls and software Soitaab delivers on the promise of an operator friendly, multi-process all-in-one fabrication system.

Since 1938, Soitaab has led the way in industrial cutting machines with over 8500 machine installations worldwide. We offer the best technology at a reasonable investment, all backed by Gold Medal Service, support, and training.

For more information on Soitaab's new OMNIAtech heavy fabrication system call us at (312) 856 6970 or email to s.ajami@soitaab.us

More pictures, information and a video of the system can be viewed on the "OMNIAtech" product page on our website at www.soitaabusa.com
