

QUIET GRIP™ TREAD SYSTEM

Quiet Grip™ tread system consists of bolt-on, non-slip metal tread covers coated with a permanent, abrasive polyurethane coating

- ✓ Cost-effective, sound-dampening, non-slip tread system for egress stairs
- ✓ Costs less and installs faster than site-poured concrete treads
- ✓ Available in choice of custom powder coat color

| | QUIET GRIP™ TREAD SYSTEM | 3/16" DIAMOND PLATE TREADS | EPOXY-COATED TREADS | METAL PAN TREADS + POURED CONCRETE |
|--|--------------------------|----------------------------|---------------------|------------------------------------|
| Tread materials | \$57 | \$65 | \$60 | \$35 |
| Temporary inserts/protective coverings | \$0 | \$0 | \$8 | \$20 |
| Concrete materials and installation | \$0 | \$0 | \$0 | \$35 |
| COST PER TREAD | \$57 | \$65 | \$68 | \$90 |

Contrast nosing

Optional contrast nosing is available for stairs with the Quiet Grip™ tread system.

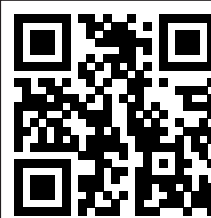

The addition of nosing in a contrasting color provides an extra measure of safety by helping users visually identify the presence of a step edge.

Quiet Grip™ for industrial stairs

Alternating tread stairs and prefabricated metal stairs can be finished with the same non-slip surface as the Quiet Grip™ tread system. For industrial stairs, the non-slip surface is applied directly to the treads as a powder coat finish.
