FOR IMMEDIATE RELEASE

***About KTA-Tator, Inc***

*Pittsburgh, Pennsylvania*

**Pittsburgh, PA** – KTA-Tator, Inc. (KTA) is excited to be making another appearance at NASCC: The Steel Conference in 2021! With over 200 certified QA/QC Inspectors, KTA sets the standard in inspection of Coatings, Steel and NDT. KTA has over 70 years of professional consultation and support during any phase of a project, whether it be design, construction, post-construction, or maintenance.

In the Construction phase, they offer structural steel and coatings inspection, and NDT services, both in the shop and field. These services often serve as a perfect partnership with State DOT's, Toll Authorities, Facility Owners, and Private Industry.

For the Design phase, KTA offers straight-forward recommendations for painting systems(s), metallizing, and/or galvanizing that best suit design requirements. This includes inspection and maintenance schedules, and specification language for the coatings-related aspects of the durability plan.

KTA also offers P3 and Design-Build support services for steel fabrication and coating system design. Some of KTA's recent P3/design-build projects include the Gov. Mario M. Cuomo Bridge (NYSTA, DB), Gordie Howe Bridge (GHIB, DB) Niagara Falls Bridge Commission (NFBC, DB), Goethals Bridge (NYNJ/PA, DB), I-4 Ultimate (FDOT, P3), and I-595 (FDOT, P3).

The proof of KTA's exemplary work in this field lies in their satisfied clients including, but not limited to, Alabama DOT, Connecticut DOT, Florida DOT, Indiana DOT, Maine DOT, Maryland SHA, Massachusetts DOT, New Hampshire DOT, New York State DOT, and Pennsylvania DOT.

If you'd like to learn more about any of KTA's wide selection of service offerings, please see their [Transportation Construction and Design Flyer](#), visit the Steel/Concrete section of the KTA Website at <https://kta.com/steel-and-concrete-services/>, or call their Corporate Office at 412-788-1300.
