

Kottler Metal Products has the largest overall pipe and structural bending capacities in the State of Ohio. We can bend up to 10" angle, 20.00" pipe, 40" channel and I-beam both easy and hard way, and can bend ferrous and non-ferrous metals, round, square, rectangular, and solid shapes.

Kottler Metal Products was established in 1915. For nearly one hundred years, our business philosophy has been based on a **dual commitment to quality and service**. For four generations we have maintained the family tradition of producing the highest caliber of metal fabrications throughout the world. We have worked diligently to achieve and maintain this reputation.

Our dedicated employees, on-job training programs, standards of excellence, and leading edge state-of-the-art fabricating equipment have enabled us to meet our **commitment to the highest caliber performance possible**. Our Quality Assurance Team carefully inspects all fabrications to insure all customer specifications are met.

Service is an integral ingredient of our commitment to excellence. Service means complete customer satisfaction. It entails procuring quality materials and scheduling fabrications so that all work is delivered within our customers time and budget parameters. Kottler Metal Products has earned the reputation for excellent performance and formidable service. Quality, service, and reputation are our cornerstones. **We are the industry leader of pipe, tube, angles, bars, beams, channels, tees, and other structural steel bends.**
