

FOR IMMEDIATE RELEASE

QuickFrames USA Earns Spot #1609 on the Inc. 5000 List of Fastest-Growing Private Companies in the U.S.

Manufacturing innovator enjoys growth and rising market share, thanks to proven products and strong customer loyalty

(MESA, Ariz. - Aug. 12, 2020) – [QuickFrames USA](#), the leader in engineered structural support systems, today announces its place on the Inc. 5000 list of fastest-growing private companies in the U.S. Ranking at #1609, the manufacturing company has been growing steadily since 2015. QuickFrames USA earned its 368% three-year revenue growth rate by consistently exceeding customer expectations and maintaining unrelentingly high product quality.

QuickFrames solves common problems caused by angle iron roof frames on commercial construction projects, offering instead no-welding-required, bolt-on, adjustable support systems for rooftop units (RTUs), skylights, roof drains and more. The classic QuickFrames product has been installed more than 45,000 times and has never once been returned. In the current era of COVID-19, QuickFrames USA has been extending discounts to medical facilities in need of frames.

“As most entrepreneurs can attest, my partners and I have made a lot of sacrifices for our business over the years,” says Bob Hasulak, partner & director of operations, QuickFrames USA. “We’ve done so because we’ve always believed in its incredible potential. Landing on this list is a testament to all the time invested, passion devoted and sweat equity contributed to growing the company, and it brings us a lot of joy. We’re thankful to Inc. for the recognition, to our loyal customers for their trust in us and to our team members for their hard work. It’s been a fun journey, and we’re looking forward to all the future holds.”

QuickFrames USA is proud to manufacture its products in the U.S., and is known for its exceptionally fast frames-to-jobsite speed. The company is an industry favorite, with more than 95% five-star ratings on Google. QuickFrames USA will be releasing a new off-the-shelf product, designed for the HVAC market later this year. The company was also nominated for BUILD magazine’s Construction & Engineering Awards for 2020; winners will be announced in November of this year.

“The companies on this year’s Inc. 5000 come from nearly every realm of business,” says Inc. editor-in-chief Scott Omelianuk. “From health and software to media and hospitality, the 2020 list proves that no matter the sector, incredible growth is based on the foundations of tenacity and opportunism.”

Not only have the companies on the 2020 Inc. 5000 been very competitive within their markets, but the list as a whole shows staggering growth compared with prior lists as well. The 2020 Inc. 5000 achieved an incredible three-year average growth of over 500%, and a median rate of 165%. The Inc. 5000’s aggregate revenue was \$209 billion in 2019, accounting for over 1 million jobs over the past three years. See the whole list and learn more by visiting www.inc.com/inc5000.
