

STEEL ERECTORS ASSOCIATION OF AMERICA

SEAA Starts Production on Ironworker Training Videos

April 12, 2021 (Winston-Salem, N.C.) The Steel Erectors Association of America has initiated the creation of a video series to support SEAA/NCCER Ironworker Level 1 craft training materials. Currently, five videos are available to SEAA members. In all, 20 videos are planned for production over the next year.

“These videos are designed to complement existing training materials. Participation in the SEAA/NCCER Ironworker Craft Training program grants members access to nationally recognized credentials for ironworkers, crane operators, and rigger/signal persons,” says Tim Eldridge, President of Education Services Unlimited and SEAA’s Craft Training and Assessment Administrator.

“Funding for these and other safety, training, and education projects is supported by the Dave Schulz Memorial Golf Tournament. We greatly appreciate the members who have given us access to their job sites and personnel in order to capture content for these videos,” said Geoff Kress, President of SEAA.

Videos currently available include:

Core Module One, 00101 Basic Safety

- Objective 2- Properly don, fit, and remove a fall arrest harness

Ironworking Module Three, 30103 Tools and Equipment of the Trade

- Objective 4- Tools and Equipment of the Trade

Ironworking Module Four, 30104 Fastening

- Objective 2- Demonstrate the turn-of-nut method
- Objective 4- Demonstrate the proper use of a tension control gun

Ironworking Module Nine, 30109 Structural Ironworking

- Objective 4-Make bolted connections on structural steel

About Steel Erectors Association of America

Founded in 1972, SEAA is the only national trade association representing the interests of steel erectors, fabricators, contractors, and related service providers. The association promotes safety, education and training programs for steel erector trades, including its Ironworker Craft Training curriculum. The association works in partnership with other steel construction, design, and steel product organizations to protect the interests of those who construct steel structures.
