

DUNKLEY INTERNATIONAL, INC.

The new *Mach-10*
has been improved
with:

- Updated components
- Lighting system
- Camera lensing
- Updated design

Specifications:

- Mixed, damaged, or out of tolerance parts are rejected automatically, without human intervention
- Inspection rates up to 10,000 parts/min. (based on components & inspection parameters)
- Easy setup
- Inspection parameters are saved and stored in the machine's computer for recall and setup
- Inspection data can be archived on the machine or sent to a central server for process and quality control analysis

Now **ISO 9001-2015** certified!

This allows us to mitigate risk, enhance customer service, increase product reliability, while still being price competitive!
