DELTA

AR 15 *Rapid* Removal A2 Hand Guard Tool

Delta Kwik LLC introduces Delta Kwik, the AR15 Rapid Removal Hand Guard Tool. This tool allows you to remove any hand guard that utilizes the delta ring from any mill Spec AR in 5 seconds or less. Great for private gun owners, gun shops, law enforcement

The Problem:

and military.

Other competitor hand guard tools can take excessive amounts of time, require a bracing system, a second set of hands or the removal/adjustment of optics.

The Solution:

Delta Kwik easily slips into the Magazine well of the AR. With one turn of the Delta Kwik handle, it compresses and holds the delta ring down allowing for easy removal of the hand guard without adjusting or removing the optics.
