FOR IMMEDIATE RELEASE

LAS VEGAS, NV (January 2019) - Dark Storm Industries LLC, a leading New York-based firearms manufacturer, expands their rifle line with the DS-15 Hurricane, a gas-powered, long-range precision rifle. Founded in 2012, Dark Storm Industries developed the DSI line of rifles to meet the ever-changing regulatory environment in states like New York, Massachusetts, Connecticut, and California. The DS-15 Hurricane will be chambered in the super-hot .224 Valkyrie.

The Hurricane is an AR-style rifle designed and built using DSI's 7075 aluminum upper and lower receivers. The DSI Ultralight Narrow Profile M-Lok 15" forearm offers plenty of area to add a foregrip or bipod. The DS-15 Hurricane also comes standard with DSI's 4 lb. drop-in trigger, DSI's nickel boron bolt carrier group, a billet ambidextrous charging handle and safety selector switch and a Magpul PRS rifle stock.

DSI puts a precedence on performance and accuracy. The .224 Hurricane features a 20" stainless-steel rifle-length barrel as well as DSI's new stainless-steel competition compensator. The barrel features a 1:7 twist in .224 Valkyrie. The Hogue® Over molded rubber pistol grip offers all the comfort of a rubber over molding, but with the durability of a fiberglass core. The no-slip grip with palm swells and finger grooves allow the user to have a comfortable, but positive, grip in any environmental condition.

The DS-15 Hurricane is available in two distinct configurations to offer a solution regardless of where you may live. Those living in free states, can enjoy our standard configuration with a detachable Magpul PMAG®. DSI's patented, top-loading, fixed magazine rifle is designed for those living in restricted states such as California, Massachusetts, Connecticut, and New York.

MSRP for the DS-15 Hurricane in black is \$1595.00 and \$1695.00 for Flat Dark Earth Cerakote®
