## **FoxFury Lighting Solutions Announces Upgraded Lumens for Nomad® Scene Lights**

*Color Accessories are now included with the purchase of Nomad® 360 and Prime Scene Lights*

OCEANSIDE, CA – The [Nomad® Scene Lights](#) from [FoxFury Lighting Solutions](#) now have upgraded lumens. The already powerful Nomad® [NOW](#), [Prime](#), [360](#), and [Transformer®](#) lights can now throw farther and illuminate surrounding scenes better without sacrificing run time. The Nomads are self-contained scene lights that are rechargeable, cordless, and waterproof. Their rugged durability and speed help users work quickly and safely at all times.

The [Nomad® NOW](#), a compact and versatile scene light, has increased from 2,500 to 3,000 lumens. The [Nomad® Prime](#), a powerful spotlight, has increased from 4,000 to 5,000 lumens. The [Nomad® 360](#), FoxFury's best self-contained 360° scene light, has increased from 7,000 to 8,000 lumens. The [Nomad® Transformer](#), FoxFury's tallest and most powerful scene light, has increased from 14,000 to 16,000 lumens.

As an added value, FoxFury is now including [Color Bands](#) with all [Nomad® 360](#) purchases and the [Red Diffuser Lens](#) with all [Nomad® Prime](#) purchases. The [Color Bands](#) help users mark key locations such as parking areas, medical stations, command posts, and accident scenes. The set comes with five silicone bands in red, yellow, orange, green, and blue. The [Red Diffuser Lens](#) can serve as warning light or help preserve night vision in low light situations.

"FoxFury not only values creating new products, but also improving existing products in an innovative way. The purpose of our Nomad® scene lights is to keep people safe, many of them using our products in dangerous situations. Increasing the lumens and including color accessories not only offers a better value for customers, but also provides them a higher quality tool to use for the task at hand," said Antonio Cugini, Director of Marketing at FoxFury Lighting Solutions.

[Nomad® Scene Lights](#) with upgraded lumens and color accessories are available now. If users are interested in setting up a demo or purchasing multiple units of Nomad scene lights, they are encouraged to [contact FoxFury directly](#).

###
