FOR IMMEDIATE RELEASE
October 3, 2018

FoxFury Releases New & Improved Scout Clip Light
Scout it Out with this rugged, durable, and everyday utility light

OCEANSIDE, CA - [FoxFury Lighting Solutions](#) introduces the new and improved [Scout Clip Light](#). The extremely versatile [Scout Clip Light](#) serves as a utility light, task light, search light, and more. This durable light is waterproof and meets NFPA fire resistant requirements, so users can rely on it working in extreme environments. It's lightweight, compact, and the built in J-Clip ensures it stays with users no matter where they go. The Scout comes in either a black or orange exterior with two different LED options; all white or white and red.

Features & Benefits

Hands Free Versatility

The [Scout](#)'s secure J-Clip allows it to be worn in a variety of ways including on a backpack, pocket, belt, vest, and even MOLLE system. The teeth on the inside of the clip ensure it stays in place no matter how rugged the task a user needs it for, allowing the user to work uninterrupted and hands free.

See and Be Seen

The [Scout](#) is available with two LED options; all white or white and red. White LED models are recommended for users that want to use the Scout primarily for search or inspections while the white & red LED models are recommended for users who want to see and be seen. The red LEDs help preserve night vision in low light conditions. This is useful for tactical night operations, reading a map or paperwork in the dark, or even checking in on the kids without waking them up at night.

The alternating flash mode on the white and red LED models can be used as a safety beacon as well, alerting others to your position. This could be used during a roadside emergency, a search and rescue operation, or even while riding a bike along a busy road.

Durable and Compact

The [Scout](#) is designed to be submersible, fire resistant, and impact resistant. Its small, compact design means it doesn't take up much space, and the low profile sits well on a belt or vest without getting in the way.

"We're excited to offer these new and improved Scout models. We responded to customer feedback by introducing this secure J-Clip, and the light is now better than ever. We feel it will

help save time and lives” said Antonio Cugini, Director of Marketing at FoxFury Lighting Solutions.

The [Scout](#) is truly a rugged, go anywhere light. Police officers can use it to stay safe on the side of the road. Fire investigators can use it to inspect tight spaces. Fishermen can use it as a safety beacon on the water. Pet owners can use it to walk their dogs late at night. The limits are endless, which makes the [Scout](#) the perfect everyday light.

###

[FoxFury Lighting Solutions](#) creates unique and cutting-edge lighting and technology products that are used in a variety of industries, including fire, police, military, industrial, forensics, film, and photography. FoxFury is best known for its LED headlamps and Nomad® scene lights. The company's products are designed to be fast, durable, and reliable.
