FOR IMMEDIATE RELEASE

RANGE SYSTEMS RELEASES PERFECTFIT™ COMPACT SHOOTING RANGE

PerfectFit uses Ti Outdoor's V23 technology to create a virtual, live-fire shooting range for one-third of the required space of traditional commercial shooting ranges

NEW HOPE, MINN. (Jan. 15, 2019) – [Range Systems](#), has partnered with [Ti Outdoors](#) to release PerfectFit Compact Shooting Range, an all-in-one range designed specifically for smaller spaces and maximum profit potential. A virtual, live-fire shooting range, PerfectFit pairs Ti Outdoors' V23 technology with Range Systems' ballistic rubber to help firearms retail business owners get the most out of their space.

PerfectFit brings all of the aspects of a standard commercial range for one third of the overall size. Its 35x39 footprint allows firearms retail owners who are short on space to provide their customers with a 10-lane interactive shooting area.

"It's rare that a commercial firearms business owner has 5,000 extra square feet of space on their property to add a traditional shooting range," said Doug VanderWoude, Commercial Managing Director at Range Systems. "With PerfectFit, that simply doesn't matter. Owners can now get a dynamic shooting space that fits their footprint and provides an interactive shooting environment for their guests."

PerfectFit is outfitted with Ti Outdoors V23 technology. Using V23, virtual targets are broadcast in each individual range lane, allowing for live-fire shooting. These virtual targets are closer to the shooter, meaning less overall space is required down range. With less space required, PerfectFit ranges experience less wear and tear, meaning decreased upkeep costs for owners.

V23 also brings more than 32 interactive game options to PerfectFit. This makes the range a great option for a new generation of shooting enthusiasts interested in live-fire gaming.

"No two operations are alike," said VanderWoude. "With PerfectFit, we aim to create a space that a wide variety of firearms retail owners can implement in their space to maximize their profits."

The PerfectFit Compact Shooting Range will be showcased for the first time at the 2019 SHOT Show in Las Vegas.
