

DELTA 14 CHASSIS, INC

## Delta 14 Chassis, Inc. and American Built Arms Company Announce OEM Partnership

**Glen Rock, PA (November, 2018)** – Delta 14 Chassis, Inc. ([www.delta14chassis.com](http://www.delta14chassis.com)), an industry leader in chassis systems for the M1A Rifle, is pleased to announce its OEM partnership with industry innovator, American Built Arms Company ([www.abarms.com](http://www.abarms.com)) to provide the A\*B Arms' butt stock, buffer tube, pistol grip, receiver adaptor and mounting hardware for their Gen 2 version of the Delta 14 Chassis.

American Built Arms Company, a Veteran-owned, Type 07/NFA FFL manufacturer of firearms parts and accessories designed, developed and manufactured the butt stock system for the Delta 14 Chassis (Part# D14C G2 AB).

“We all know that the M1A has a niche audience that can be appreciated by someone who knows the rifle. A\*B Arms had already manufactured a tactical adaptor for other rifle systems. When Bill Bovensiep at Delta 14 Chassis contacted us, we saw an excellent opportunity to work with a company that saw the vision to accelerate the design of the M1A to a whole new level,” said Adam Edelman, VP and Co-Owner at American Built Arms Company.

“Delta 14 Inc. is excited to work closely with A\*B Arms. Our Visions and Mission is in complete alignment from Quality to Customer Service. Complementing the American Made Delta 14 Chassis with a stock from A\*B Arms amplifies our message to the public “we hear what you want and we will deliver” said Bill Bovensiep CEO at Delta 14 Inc.

The new Delta 14 Chassis Gen 2 will be made available through [www.Delta14chassis.com](http://www.Delta14chassis.com) for USA sales and Wolverine Supply in Canada. In addition, Delta 14 Inc. has also partnered with Bula Defense which manufactures the M1A platform as well. Bula has launched a left handed version rifle that Delta 14 Inc. is proud to have developed with Bula Defense. Not only is the chassis system available as a stand-alone, but now it is offered with the rifle direct from a top-notch manufacture. Bula Defense stands behind every rifle they make and the tolerances are some of the best in the industry. Bula Defense has also adapted the A\*B Arms stock on this platform that they sell direct and we could not be happier with its performance.

### **About Delta 14 Chassis:**

Delta 14 Inc. has been established since 2008 and is based in Rochester Hills Michigan. Looking at the M1A market it was apparent there was a void in the aftermarket stock options. Work began to bring a high quality at a good value price to the consumer was the forefront mission that has propelled Delta 14 Inc into today's market. Giving the consumer options and flexibility in addition to ease of installation pushed the Delta 14 Chassis to become modular. The simple idea to marry the shotgun and rifle industry was the focus of the Delta 14 Chassis concept. Due to the vast amount of Mossberg 500 stock options in the market it was thought to use this surplus of options and adapt the M1A rifle platform. Never before has this been done and for this reason a US Patent was issued for the Delta 14 Chassis. Currently on Gen 2 version, the platform offers a lighter chassis with the Magpul M-LOK system in addition to a better receiver compliant fit.
