

## **UM Tactical to Display the 9mm R.A.G.E.™ Total Compensation System at Shot Show 2019.**

*Lake Worth, Florida, April, 2017* – UM Tactical was proud to announce the extension of its industry leading Rapid Adjustable Gas Expulsion (R.A.G.E.) Total Compensation System to fit the popular 9mm PCC rifle platform. The R.A.G.E. Compensator is still the world's best functioning and reconfigurable recoil tuning and management device. The Compensator has been specially designed to accept common 9mm thread pitches and gas pressures. The Comps are available in 1/2x28 or 1/2x36 with a black or silver finish.

Each kit includes 6 adjustable tuning port washers. These port washers allow you to divert the high-pressure gases with interchangeable angled ports providing exceptional and unmatched performance. The included TCS Barrel device has three port washer mounting zones (high, medium & low pressure). This allows the user to completely adjust the gases to not only best fit the rifle, but the shooter as well. Our system does not require any drilling to adjust and allows the user to change the gas direction by simply changing the washers or even just their location on the muzzle device. Placement of the port washers allows for total control and tuning of your rifle to your liking. Once adjusted, the R.A.G.E. provides a virtually no muzzle rise and minimal felt recoil, even on fully automatic weapons.

The R.A.G.E. is precision machined from stainless steel and aerospace alloys, right here in the USA. This Not only allows for extreme durability, but an unmatched level of quality control and integrity.

The R.A.G.E. 9mm is now available for sale in 1/2x28 or 1/2x36 and is priced to sell with an MSRP of \$159.99. The kit includes a barrel device, 6 port washers, comp nut, set screws, hex wrench, crush washer and tuning guide in a compartmented plastic case. The R.A.G.E. system conforms to all 3 Gun Nation and USPSA Multi-gun rules.

UM Tactical is a South Florida based company that specializes in recoil management devices, holsters (carry, competition, duty), mag holders, and pistol optic mounting solutions (UM3, shims). For more on these products, please visit:
