

Jackery Introduces Honda Official Licensed Product
Also Expands Explorer Series of Lithium Portable Power Stations

January 7th 2019: Jackery, a trusted leader in outdoor portable power, is pleased to announce Honda, the mobility company known for their performance and innovative technology, has paired up with Jackery, to launch a new line of sustainable energy products. The Honda brand is long known for its commitment to a sustainable future, making the collaborative line of portable power solutions a perfect addition to Honda's upcoming launch of the 2019 Insight Hybrid.

The Honda by Jackery power stations and rugged portable chargers are competitively priced and align with Jackery's mission of developing energy solutions that power outdoor life experiences.

The Honda Official Licensed Product portfolio of these trusted brands features a duo of portable power stations with SRP starting at just \$299. Designed with the outdoor enthusiast in mind. The lightweight portable power stations feature a rechargeable lithium battery that allow adventurers to enjoy an endless supply of power for extended time outdoors. "Our products and Honda's commitment to sustainability really make this the perfect partnership to serve the outdoor industry," explained Jackery CEO Z. Sun. "Our shared promise in product excellence will allow outdoor enthusiasts everywhere to connect, power and charge a variety of devices to fulfill their experience."

Honda by Jackery products are available now and are backed by a 2-Year Warranty. The Honda by Jackery product line will be available via Jackery.com and through AutoZone online and select stores.

The Honda by Jackery product line includes:

Honda HLS290 (\$399)

Lithium-Ion portable power station featuring 290 Watt-hour energy storage. The HLS290 provides safe, quiet, mobile power to go places wherever your adventure takes you. Now you can charge up activity electronics such as drones, cameras, smart phones, and a host of other recreational equipment. The HLS290 is designed for an active outdoor lifestyle and also serves as a reliable power source in case of emergency.

Honda HLS 200 (\$299)

The most compact and lightest Lithium-Ion portable power station in its class at only 2.6 pounds, the HLS 200 features 208 Watt-hour energy storage capacity. The HLS 200 features AC, 12V, and multiple USB ports (including USB-C) to power your mainstream electronics. The HLS 200 is designed for mobility with an easy travel handle and compact form factor.

In addition, Jackery is expanding its Portable Power Station (Explorer Series) of Lithium-based, solar-ready portable power solutions with the high-capacity Jackery Explorer 1500 and mid-level Explorer 500.

Demand for portable power outdoors continues to increase as technology continues to improve step for step with the desire to spend more time outside while remaining connected through personal electronics. Used for both recreational portable power as well as emergency backup power, the Jackery product portfolio meets the portable power needs of outdoorists in a variety of environments, including camping, climbing, hiking, and tailgating.

"Modern campers desire to stay connected while off-grid, whether it be to entertainment, productivity or practical devices. Now, consumers can be prepared and have fun with a Jackery Explorer," said Z. Sun, CEO at Jackery. "The Explorer line-up allows Jackery to deliver tremendous value for outdoor portable power that is designed with safety in mind."
