MB QUART SHOWS NEW RV DIGITAL MEDIA SOURCE UNITS

New models unveiled at the RVX Show in Salt Lake City

Salt Lake City, UT - With more than 5 decades of experience in audio for vehicles, MB Quart now brings a complete new offering to the RV enthusiast and manufacturer.

RV Experience
March 12-14, 2019
MB Quart Booth 4559 / Hall 5

New model RVDVD2.0 is open for preorders during the show. Features included are:

- Multi-Zone Audio – Control audio levels in multiple zones in the vehicle. RVDVD2.0 allows for 2 audio zones. Perfect for a large floor plan.
- Built-in DVD – One unit provides top of the line DVD visual quality without the need for a separate component in your RV
- AM/FM/BT4.0 – All the inputs required for entertainment, regardless of where your RV parks on the planet.
- Bluetooth Connect – Our pairing technology allows the source unit to securely connect Bluetooth enabled devices putting the music right at your fingertips.
- Quick Pair - No more frustration with trying to pair. When the unit powers up, it immediately connects to the last device connected. For a first time connection, you only have to select "MB Quart" from your Bluetooth menu and you are connected
- HDMI Command Center – All audio and video from satellite or other digital services are pushed to the TV monitor and audio system through the RVDVD2.0
- High Power Amplifier – Built-in 160 watt 4 channel amplifier (4x40 watts) delivers plenty of power for all speakers connected.
- High Contrast Display – Regardless of full sun or shade the controls for your system are clearly visible

Brian Sherman, Director of Business Development says, *"We think the market is hungry for an all in one entertainment solution like the RVDVD and MB Quart is the brand to bring it."*

Another new component in the RVM2.0 also being reserved by RV dealers at the Salt Lake City show, is the MB Quart RVM2.0. This unit features:

- Multi-Zone Audio – Control audio levels in multiple zones in the vehicle. RVM2.0 allows for 2 audio zones.

- Compact Design – The new source unit was designed specifically for the tight installation restrictions of an RV. The RVM2.0 is very shallow which means it has a very small foot print. This design allows you to put high end audio where you could not fit a full size radio or source unit in the past.
- Mechless Design – This mechless (no moving parts) unit provides high-tech performance of the audio system with rock solid reliability regardless of the roads you travel.
- AM/FM/BT4.0 – All the inputs required for entertainment, regardless of where your RV parks on the planet.
- Bluetooth Connect – Our pairing technology allows the source unit to securely connect Bluetooth enabled devices putting the music right at your fingertips.
- Quick Pair - No more frustration with trying to pair. When the unit powers up, it immediately connects to the last device connected. For a first time connection, you only have to select "MB Quart" from your Bluetooth menu and you are connected
- HDMI Command Center – The RVM2.0 allows quick and simple access to your technology. With the HDMI connector on the front panel, the signal passes through the audio and video processors to the HDMI connector on the rear panel. This means you can connect an iPad, Laptop, Digital camera or other HDMI device to the front and everything shows up on the TV and plays through your audio system including your typical satellite receivers.
- High Power Amplifier – Built-in 160 watt 4 channel amplifier (4x40 watts) delivers plenty of power for all speakers connected.
- High Contrast Display – Regardless of full sun or shade the controls for your system are clearly visible.

Concerning the new RVM2.0 Sherman remarked, *“The RVM2.0 is a problem solver. It’s an inexpensive way to get multi zone RV audio into a tight space. We’ve taken what we’ve learned in the Powersports and Marine markets and brought that to the RV.”*

PRICING & TIMING

Model	Pricing	Ship Date
RVDVD2.0	\$	05.15.2019
RVM2.0	\$	05.15.2019

Regarding the overall MB Quart offering for RV audio systems Sherman concluded, *“RV Audio and system design is really easy with MB Quart systems. We have laid out several systems for all Classes RV’s and towables on our website. These new multi zone digital receivers are the heart of these systems.”*
